Voyage

Arik Levy

A space for a peaceful mind

Designed by Arik Levy in collaboration with the Vitra Design Team, Voyage is a system offering new possibilities for a peaceful mind. Motivated by the premise that time spent in the bathroom is not just a physical experience rather, it is an interval; Voyage creates a space where the body and mind meet, where the emotional and spiritual spheres of an individual's existence are activated.

Understanding that this most human personal experience deserves an individualized space, the product range offers the tools to customize personal space and enhances the spiritual experience.

A toolbox for more

Voyage is designed as a toolbox. Its extensive size and colour options allow each person to construct their very different and preferred set-up. As a canvas to create a variety of compositions, Voyage offers surprisingly versatile options for creative minds in search of the most blissful spaces.

Leading innovation: a system that evolves

Voyage offers a system that evolves and adapts to changing needs and desires over time. It is easy to add and remove elements, each additional unit helping to transform the existing space into the next chapter in one's life. Flexibly solving permanent or semi-temporary needs, the comprehensive system design solution never allows design mistakes and always leads to a visually pleasing new result.

Voyage

Flexibility both horizontal and vertical

Beyond modularity, Voyage is a flexible system that challenges the ordinary bathroom set-up, providing horizontal and vertical positioning. Storage space can be divided and distributed around the room, with no height or position prerequisites. Lower or higher positions can be defined by the user, based on their permanent or temporary needs. The flexibility also extends to colour, depth and size options, making Voyage one of the most versatile bathroom series ever created.

More than a washbasin

• —

The Vanity washbasin is designed to blend the looks of bowls and vanity washbasins. To enrich the user experience, the Vanity washbasin area also offers a convenient combination of dry, semi-wet and wet areas. The ceramic surface provides hygiene and ease of cleaning.

A surrounded WC area

To challenge existing perceptions, Vanity positions the WC area as one of the active elements of the bathroom set-up and surrounds it with a flexible universe. The result is a WC area that is no longer isolated.

Vanity's WC pans incorporate VitrA's Rim-Ex technology, an innovative design for effortless cleaning. By eliminating the hard-to-clean rims, this technology prevents the accumulation of germs and provides superior hygiene, supported by research that indicates a 95% improvement in germ prevention.

In addition, Vanity's panel suits to this WC pan design with its simple aesthetics. The flat glass facing conceals the cistern and inspection opening.
